Microbe Research

At home, research information on your assigned disease and complete the chart below completely. Bring this information back to class. It will be used to complete an assignment. Try to find and print a picture of the disease-causing microbe.

Disease:		
What microbe causes the disease? Give the scientific and common name. (There may be more than one.)	Common name	Scientific name
What type of microbe is it? (virus, bacteria, protist, fungi?)		
Is there a population who is most often affected? Who?		
What are common symptoms of the disease?		
How is the disease transmitted?		
Vaccine and prevention: Is there a vaccine for the disease? Vaccine facts (when was it developed? when is it administered?) How can it otherwise be prevented?		
What is the treatment for the disease?		
Interesting facts:
